

**Stage 1
soil capping works**

Quarry Park masterplan works

Soil capping works will commence in mid September

The first stage of soil capping at Quarry Park is expected to take seven months and will establish suitable ground conditions for future park improvements in keeping with the Quarry Park Masterplan.

The Stage 1 area is shown on the plan above and will include:

- upper western side of the park including the oval with new irrigation and turf surface
- northern edge of the park in preparation for mountain bike trails (to be built in 2019)
- construction of the Melbourne Korean War Memorial.

Council will strive to minimise disruption to residents during the works. For any further information please contact Council's Project Management Office on 9688 0200.
